PROFESSIONAL SUMMARY

Backend Engineer with 3+ years of experience developing Python services, REST APIs, PostgreSQL-backed applications, and real-time data pipelines. Hands-on experience with FastAPI, Django, Docker, Kubernetes, WebSockets, and LLM integrations. Built end-to-end AI products featuring streaming inference, multi-agent orchestration, and secure API-key management.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, TypeScript
Backend: FastAPI, Django, REST APIs, WebSockets, Server-Sent Events (SSE), asynchronous processing
Databases: PostgreSQL, MongoDB
Infrastructure & Tools: Docker, Kubernetes, Git, GitHub, GitLab, Jenkins, Postman
AI Integration: Gemini API, LLM orchestration, multi-agent workflows

PROFESSIONAL EXPERIENCE

Backend & AI Engineer | Neurabit Solution LLP *May 2025 – Present*

- Developed and deployed Python backend microservices with FastAPI and Django, packaging services in Docker and using Kubernetes for deployment and scaling.
- Implemented WebSocket-based communication to stream application events and data to real-time dashboards and client applications.
- Integrated LLM capabilities into backend workflows for automated incident alerts and report generation.

Backend Engineer | LivNSense Technologies Pvt Ltd *January 2023 – April 2025*

- Developed Django backend services and REST APIs supporting enterprise application workflows and frontend integrations.
- Designed PostgreSQL schemas and optimized queries using indexing and SQL techniques to support application performance and data integrity.
- Implemented PostgreSQL stored procedures and triggers for database-side processing and consistency.

SELECTED PROJECTS

UIWiz — AI UI Development Platform *January 2026*
TypeScript, Gemini API, Firebase, PostgreSQL, Sandpack, SSE

- Built an AI-assisted UI generator that converts text and image prompts into React and Tailwind code and supports iterative refinement across conversation turns.
- Implemented Server-Sent Events for streaming generated code into a live preview and a Sandpack-based browser environment for executing multi-file projects with dependencies.
- Added model failover across Gemini variants to handle rate limits and model outages; designed bring-your-own-key handling with AES-256 encryption for stored API keys.

Kompete — AI Research Engine *June 2026*
FastAPI, PostgreSQL, Gemini API, Next.js, SSE

- Built a multi-agent research workflow generating structured diligence reports covering financials, funding, unit economics, sentiment, and competitors.
- Orchestrated parallel Gemini tasks through a FastAPI backend, streamed progress with SSE, and stored application data in PostgreSQL.
- Developed structured report views and PDF export in Next.js; decomposed research into focused tasks to work within model context and output limits.

PrepStudio — AI Learning Platform *2025*
FastAPI, PostgreSQL, Next.js, LLM Voice Agents

- Built an end-to-end learning application that generates topic-specific study plans based on user goals and timelines.
- Implemented an interactive voice tutor supporting follow-up questions and interruptions, plus an AI mock-interview workflow with performance scoring.
- Independently delivered backend services, real-time voice integration, and frontend application.

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering 2018–2022
Visvesvaraya Technological University CGPA: 7.1
